# Lone Worker Protection App

They trust us...

# LEGISLATION

Regulations are imposed to companies to respect legislation (decrees, laws...)

Definition

## Lone worker protection device

A lone worker protection device enables to **alert the emergency services** in case of a danger.

## Lone worker

Employee who performs any activity that is carried out in isolation from other workers **without close or direct supervision.**

Legislation

## According to the European Union :

The directive 2007/30/EC of the European Parliament and of the Council amending Council Directive 89/391/EEC.

This directive concerns improvement of employee's health and safety.

Check its application in different European countries and also recommendations in the UK and Switzerland :

# TRIPLE PROTECTION

Beepiz brings you a triple protection

## Worker protection :

Beepiz **protects the lone worker** and guarantees a fast intervention of the emergency services in case of a problem.

---

## Management protection :

By providing lone worker protection which will alert the emergency services in case of an emergency, Beepiz allows supervisor to respect legislation's conformity. Proofs and use reports are available.

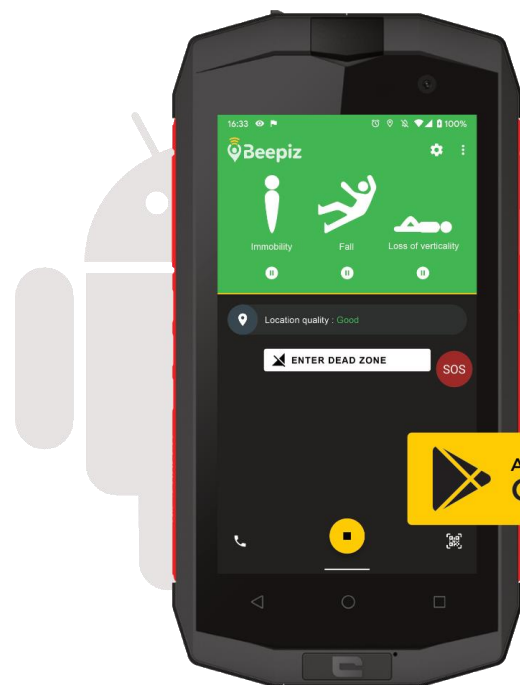

## Company protection :

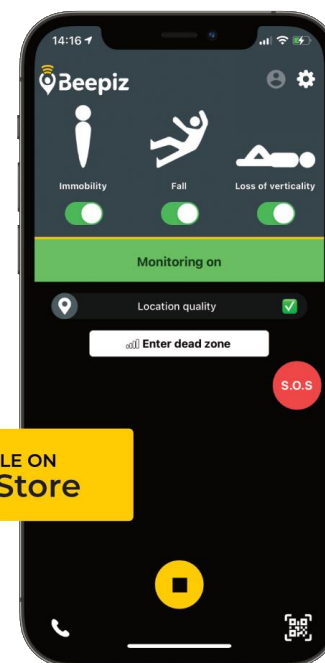

**Company benefits from an indirect protection of the brand image.** Beepiz brings a positive image and contributes to corporate social responsibility.

# AVAILABILITY

with ATEX  
certified  
smartphones

# 7 KIND OF ALERTS

The guarantee of an alert in case of a danger

## Automatic Detections

*Fall over*

*Lack of  
movement*

*Man down*

## Manual Alerts

*SOS*

*Attacks*

## Dead zones Alerts

*Dead zones*

*Loss of signal*

Anticipate danger with « dead zones » alerts and « loss of signal » alerts !

# DEAD ZONE ALERTS

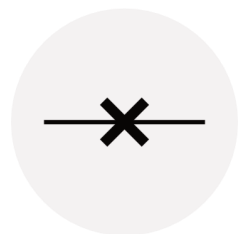

Predict absence of monitoring

## Dead zone alert

Dead zones are areas where there is no network. A lone worker can indicate when he is entering a dead zone and set a define time : for instance 5 or 10 minutes.

**If he is not back from a dead zone after a define time, an alert will be automatically triggered!**

## Loss of signal alert

When a worker is without signal for a long time, an alert will be sent.

# POSITIVE SECURITY

Be sure that your beepiz app is operational

## SIMPLE INDICATION FOR USER :

### Green

Positive security is 100% operational.  
If anything happens, an alert will be sent immediately.

### Orange

Positive security is not 100% operational  
If anything happens, the alert may not be sent correctly.

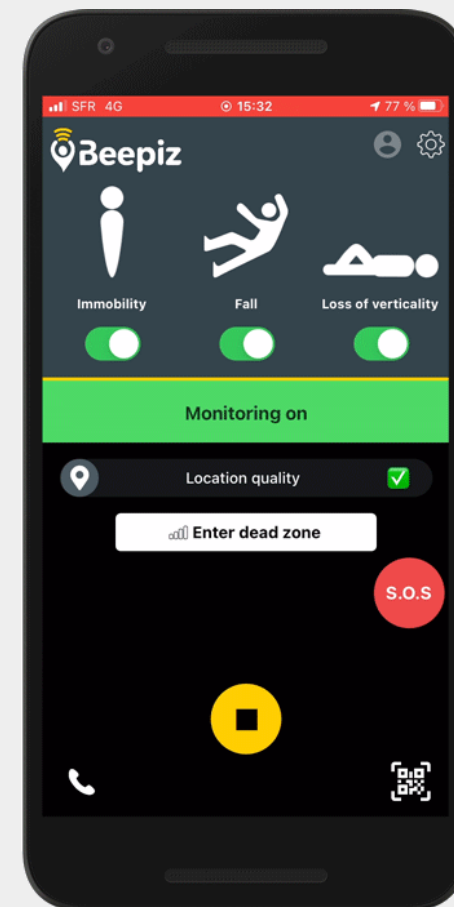

### Red

Positive security is not available.  
If anything happens, the alert will not be sent.

### Anticipate more than regret.

Check if alerts can be sent depending on where you are working.

# RICH ALERT

Beepiz rich alert has plenty of information

## Pre-alert

Alarm

Vibrate

Flash

## Several channels

Sent by our own **double datacenters**

SMS

E-mail

Phone  
(texte to speech)

Web portal

Beepiz Manager app\*  
*With notification in June 2021*

**SIMULTANEOUSLY!**

Alert can be sent to customer,  
**telemonitoring operator...**

## What includes rich alert ?

Continuous updates  
of localization until  
the alert is closed

Kind of alert

User identity

Time and date of  
monitoring start

Shortcut for a quick call to  
the alert's sender

Outdoor location

Indoor location  
with maps

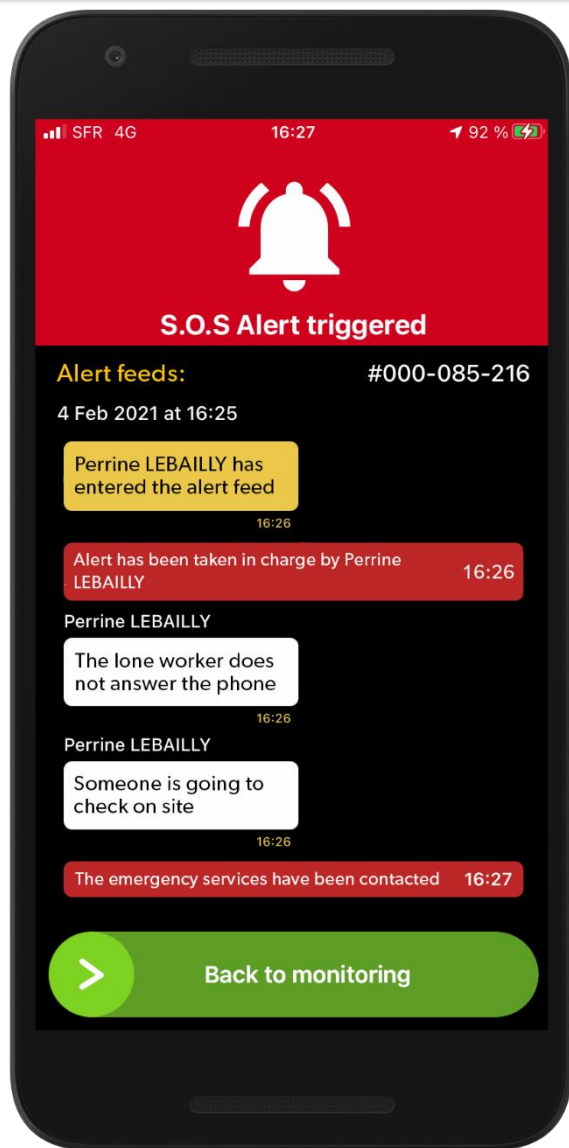

Indoor location  
with pictures

Timeline with last positions  
(before/after the alert)

# INTERACTIVE ALERT FEEDS

Interact with your remote workers using our built-in live chat

Interactive alert feeds seen by the injured lone worker

Thanks to our built-in live chat included in our detailed alert, receivers of an alert can communicate and agree on the best process to adopt.

They can :

- preset messages to improve communication
- talk freely about the alert

## Improve the communication

Contrary to cascade alert mode, interactive alert feed simultaneously warns all receivers of the alert.

I can not deal with the alert at the moment

Ok, I am dealing with it!

Me too, I am going to check it.

The lone worker is not answering the phone.

## The lone worker feels safer and it limits psychosocial risks

Lone worker who is injured can read or listen to the exchange on his Beepiz app thanks to text-to-speech. Thanks to it, he can feel safe and he knows that supervisors/colleagues are dealing with his request.

# INDOOR LOCATION

Use our ActionPoints for indoor location

**Know the battery level:**  
battery level is available on the  
management portal

**Add your plans on the  
portal** to save time in case  
of emergency!

<b>Autonomy</b>	Up to 80 months
<b>Battery</b>	4 x AA (10400mAh)
<b>Protection level</b>	Dust resistant IP67
<b>Radius</b>	Up to 100 meters
<b>Dimensions</b>	84 x 84 x 24 mm

# MORE FEATURES...

## **PPE checklist**

The worker can check before starting his work that his PPE checklist is completed.

## **Automatic inhibition**

It allows you to stop unwanted alerts in two cases: while you are on a meeting, or when you are driving.

## **Mass notification**

You can now send broadcast messages to your lone workers.

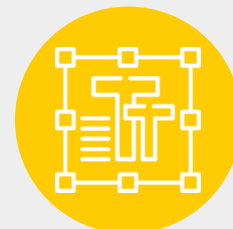

## **Multiusers/multilingual**

Beepiz is available in different languages. With an identification card, you can share a license, and the app will be set up in the user's language.

## **Remember to switch on your device**

According to a planning established by your own, a notification can be sent if Beepiz app is not on: *"Remember to switch on your Beepiz app for your safety"*

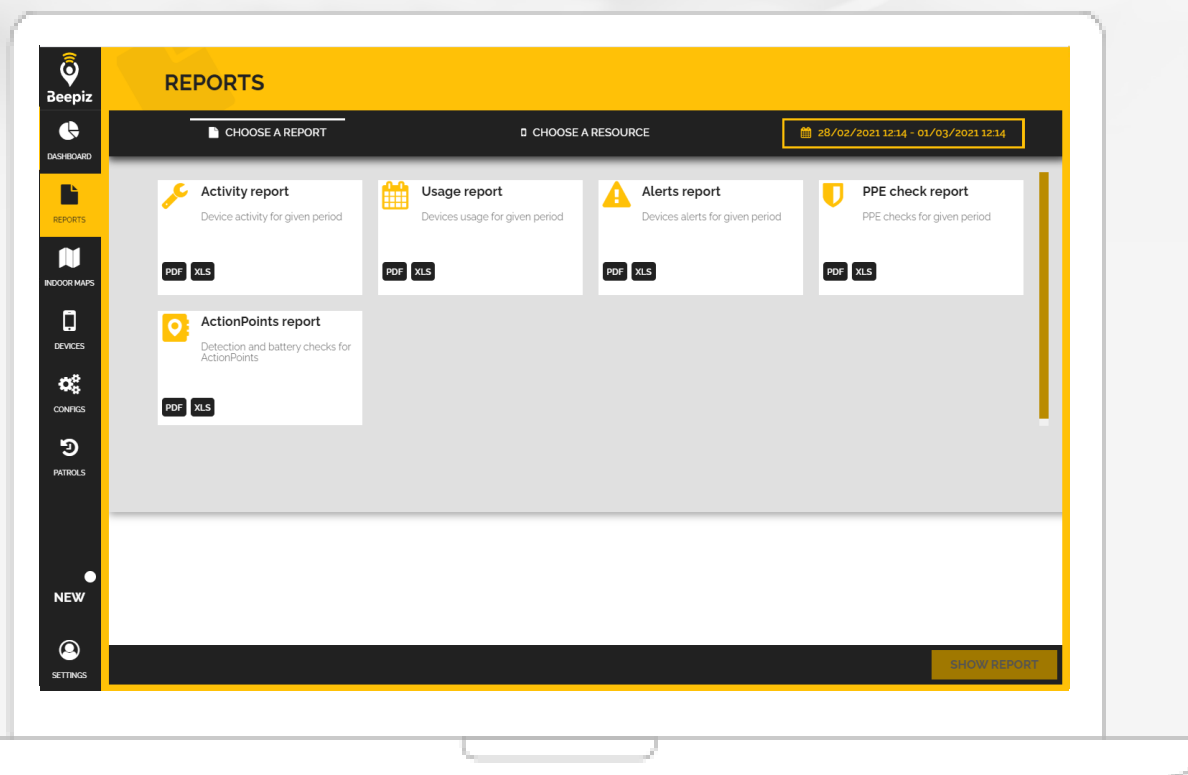

## **Customized section**

Each customer can customize this text area. Available in the app, this text area can be displayed each time you open your Beepiz app.

# MANAGEMENT PORTAL

Your different tools...

**A management portal has been created to answer management expectations**

**Management tools:** manage easily deployment, licences, user profiles, and define the sensitivity of alerts

**Live events:** check which devices are under monitoring and get access to datas

**Plans :** Be 100% independent with indoor locations, download your plans, and manage your ActionPoints

**Reports :** check easily *use reports* of lone worker devices (several information available :numbers of session, duration of monitoring etc.)
